

Urbanscape Landscaping Solutions

Urbanscape is an innovative and easy to install system that boasts high water retention capacity designed specifically for landscaping applications such as residential gardens, sports fields, commercial spaces, cemeteries, public parks and various complex green architectural solutions.

What is BERA® Urbanscape Green Roll?

BERA® Urbanscape Green Roll (HTC GR) is a lightweight landscaping product made of long rock mineral fibers specially needed to form a compact and dimensionally stable felt. The product is made solely of virgin rock mineral fibers. BERA® Urbanscape Green Rolls ensure excellent water retention and conservation in an array of landscaping applications and is a good addition to existing growing mediums.

Benefits:

- ✔ 100% pure mineral growing media made of rock mixture; pure rock, with no additives.
- ✔ Excellent water retention capacity (can hold up to 85% volume of water).
- ✔ Significant water savings.
- ✔ Long-term stability and durability.
- ✔ Unique horizontal water distribution (up to 50 cm dispersion from the water source in all directions) makes it ideal for sub-irrigation.
- ✔ 100% controlled production process to provide consistent properties (acquired certificates: CE, EUCEB, RAL, ISO 9001, ISO 14001, OHSAS 18001).
- ✔ A proven growing medium in the horticulture business.

What is BERA® Urbanscape Green Cubes?

BERA® Urbanscape Green Cubes are a water absorbent growing medium made of virgin rock mineral fibers. BERA® Urbanscape green cubes are used primarily as a soil enhancement product, which helps build better soil structure and provides higher water retention capacity and better aeration of the growing medium. Water contained in BERA® Urbanscape Green Cubes is always easily available for plant uptake.

BERA® Urbanscape Green Cubes are used for different home gardening applications:

- ✔ Use alone as a growing medium in pots.
- ✔ Mix with other pot media (soil, coconut fibers, peat etc.) to improve water retention capacity and aeration.
- ✔ Mix into sandy or loamy garden soil to improve water absorption and water storage capacity.

Benefits

- ✔ Improved growing medium characteristics.
- ✔ Less environmental stress on plants.
- ✔ Better plant growth and development.
- ✔ Increased green mass of plants.
- ✔ Better plant resistance.

What is BERA® Urbanscape Green Flocks?

BERA® Urbanscape Green Flocks are made of virgin rock mineral fibers. BERA® Urbanscape Green Flocks are used as a growing medium for home and professional use, or to augment high quality soil for both indoor and outdoor plant production. Green flocks have superior water storage and release capabilities, making water and nutrients easily accessible to plants. Green flocks improve soil

structure and help protect plants from environmental stress.

BERA® Urbanscape Green Flocks are used as a high-quality soil enrichment product in professional landscaping applications:

- ✔ Mix with other container media (soil, coconut fibers, peat etc.) to improve water retention capacity and aeration.
- ✔ Mix into sandy or loamy soil to improve water absorption water storage capacity and water-air ratio.

Benefits

- ✔ Better growing medium characteristics.
- ✔ Less environmental stress on the plants.
- ✔ Better plant growth and development.
- ✔ Increased green mass of plants.
- ✔ Improved plant resistance.
