# Decoland Poly Lock

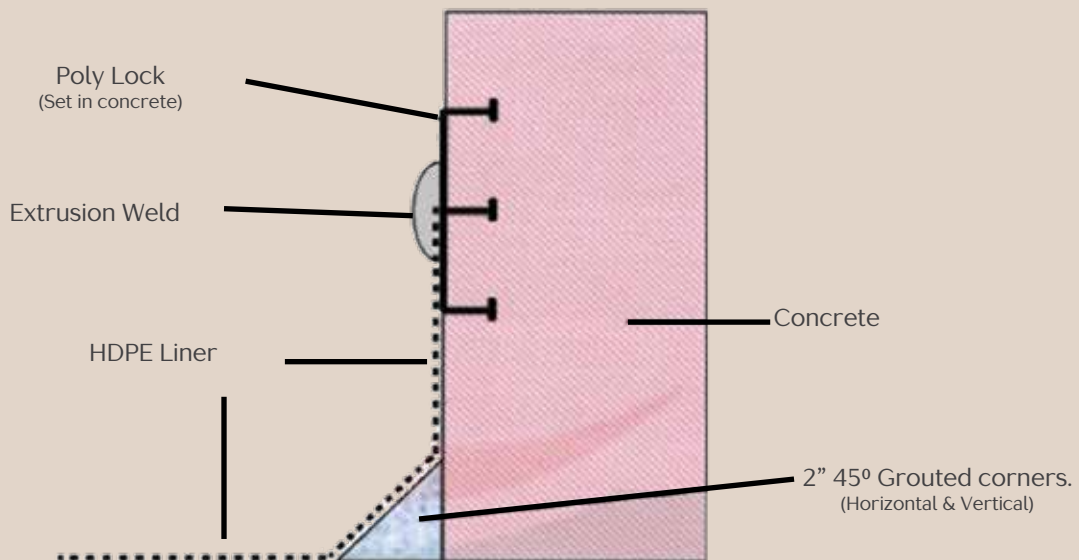

Due to the high need of fixing the HDPE liner to concrete walls in different works, especially in the structure sealing and foundation projects, Decoland has decided to produce an E-Profile which is used mainly for this purpose. The Poly Lock E-Profile is made of HDPE resin with carbon black of not less than 2%. This E-Profile has three T shape anchors which allow the profile to be embedded strongly with the concrete wall and give it a strong bonding.

## Dimensions

Properties	Value	Units
Length of rod :	4	m
Thickness:	4	mm
Width :	150	mm
Anchor finger length :	25	mm
Width of nodes :	12	mm

Note: Length of rod can be produced according to client requirements.
